## Overview and Summary of Findings

This report reviews the input from the Public Input Meeting event for the 2025 Comprehensive Plan held on April 28, 2015 at the Brevard Community Church. The objective of this report is to synthesize and review the concerns, ideas, and aspirations expressed at the event. This information combined with the data from the survey and community meetings, will provide the framework for the 2025 Comprehensive Plan.

The community input provided during the Public Input Meeting revealed several important overarching assets, opportunities, and obstacles when it comes to growth and development. The common overlapping themes include:

1. **Education, environment, and people** are the greatest assets of Transylvania County.
2. **Shared values** (people) and **natural resources** must be protected and preserved as the County grows.
3. The greatest obstacles in the County we will face over the next ten years are **funding, leadership** (polarizing politics, city/county division, lack of common vision), and **lack of infrastructure** (water/sewer, roads, utilities, health care) as key obstacles to overcome.

## Background

### *What is a Comprehensive Plan?*

A comprehensive plan is a long-range guide for making development and policy decisions based upon the growth preferences of the public and elected officials of Transylvania County. The comprehensive plan evaluates existing conditions, projects growth and development patterns, and identifies needs and assets of the community. Furthermore, the comprehensive plan establishes a vision for the County and sets goals and objectives to achieve this vision. The comprehensive plan considers all seven of the basic planning elements (population growth, housing, economic development, natural resources, transportation, community facilities and services, and land use) as well as defines character traits that are unique to Transylvania County (e.g. recreation, tourism, health). The comprehensive plan is not a regulatory document, but is a guide for policy and development decisions over the next 10 years.

**2025 Transylvania County Comprehensive Plan**

**Shaping Transylvania County**  
**A Survey for the 2025 Comprehensive Plan**

**What is a comprehensive plan?**  
A comprehensive plan is a long-range guide for making growth management policy decisions based upon the preferences of residents and elected officials. The comprehensive plan addresses the strengths, weaknesses, opportunities, threats and desires of the community. It also establishes a vision for the county and sets goals and objectives to achieve this vision. The comprehensive plan is not a regulatory document, but is a guide for policy and development decisions over the next 10 years.

**The comprehensive plan has three components:** an Existing Conditions Report, Public Participation, and an Action Plan. It contains 3 questions: (1) What is the current condition of Transylvania County; (2) What do we want Transylvania County look and feel like in 10 years; and (3) What needs to happen to achieve that?

**Why Should We Do Comprehensive Planning?**  
Transylvania County has experienced major changes over the last few years. The County is not the same place it was 10 years ago, nor will it be the same place 10 years from now. Comprehensive plans address ways to improve life for its current citizens, businesses, and visitors by evaluating basic planning elements such as population, housing, economy, transportation, natural resources, community facilities and services, and land use. This includes building upon assets, addressing weaknesses, and identifying opportunities. These goals are determined by the citizens answering the question, "How do you want Transylvania County to grow over the next 10 years?"

**Where are we in the Process?**  
Planning Board and staff have recruited more than 40 "Community Advocates" to assist with the Public Participation component. Staff and Planning Board have completed and presented the "Existing Conditions Report" and are now full swing in the Public Participation component.

**How Can You Get Involved?**  
**Fill out a Survey**  
"30 Minutes for 30 years of growth" is all it takes to give us your input. This survey can be found online or at several distribution points throughout the County after April 28, 2015. <http://transylvaniamap.transylvaniamap.org/1023>

Once you have completed your paper survey, you may drop it off to the Planning Department Office (Community Services Building, 400 East Morgan St., Brevard) or at the following convenient locations:

- Galloway's (Bakers Grove, NC)
- Mulberry's Home / Joe Hardware & Rental (Spartanburg, NC)
- Mountain Town Mall
- Transylvania County Library
- Transylvania County Parks & Rec - Activity Center

**Attend a Community Open House**  
Staff, Planning Board, and Community Advocates are coming to your local community for an open house. View the locations, days, and times on our website: <http://transylvaniamap.transylvaniamap.org/1023>

**Public Hearings**  
Meetings of the Planning Board and County Commissioners will offer opportunities for public input at all of their meetings, and several meetings will be reserved specifically for comments on the draft plan and final plan. Take advantage of these opportunities to be clear about your goals for the future of the County.

You can also sign up to receive email updates about the 2025 Comprehensive Plan, by sending a request to April Alon [april.alon@transylvaniamap.org](mailto:april.alon@transylvaniamap.org) or Mark Brown at [mark.brown@transylvaniamap.org](mailto:mark.brown@transylvaniamap.org).

**For More Information, please visit us online at <http://planning.transylvaniamap.org> or call 828.888.3785**

The 2025 Transylvania County Comprehensive Plan will guide growth and development by addressing three main questions: (1) what is the current condition of Transylvania County; (2) what do we want Transylvania County look and feel like in 10 years; and (3) what needs to happen to achieve this?

### *Why should we plan?*

Transylvania County has experienced major changes over the last ten years. The County is not the same place it was 10 years ago, nor will it be the same place 10 years from now. Like other counties in the Western North Carolina region, and all over the country, Transylvania County must take active, thoughtful steps to compete in a competitive global environment. It must do what it can to improve the quality of life for its current citizens; enhance the qualities that make Transylvania County a desirable place to live, work, visit, and/or start a business; and preserve the existing culture that makes Transylvania County what it is. The path to accomplish these goals involves a comprehensive planning process that evaluates where Transylvania County has been, where it is currently, and where it is going in the future.

The planning process gives an analysis of existing trends and growth patterns in all sectors of the community: population, housing, economics, transportation, natural resources, land use, and community facilities and services. It asks the question of the citizens, “How do you want Transylvania County to grow over the next 10 years?” And it provides the framework for how to achieve this end goal. Overall, a comprehensive plan gives you factual data on where we are currently heading based on the “business as usual” model, documents how the citizens want to grow, and provides community leaders with the framework for making the decisions that assist in accomplishing this goal.

### *Public Participation Process*

Community members want to participate in major decisions that are important to them. Comprehensive planning attracts public involvement because people are directly affected by the decisions made and actions taken. Therefore, it should not be a question of whether to have public participation but rather how to design a process that yields the most benefits.

The primary aim of a public participation process is to allow meaningful input into a governmental decision-making process. While involving community members in the County’s comprehensive planning processes takes additional time and resources, it has many benefits:

- Public participation processes are opportunities for mutual education of everyone involved.
- Decision makers often can get additional information, creativity, and input about values, attitudes, and preferences from the citizens who will be most impacted by their decisions.

- Public participation may yield changes in behavior. The likelihood of people changing their behaviors increases when they are aware, informed, and self-convinced that the change is needed.
- Effective public participation can help build relationships between community members across demographic groups, geographical distances and differing political viewpoints.
- Community members are more likely to support decisions that they help make, even when the decisions are hard.
- Taking part in effective public participation encourages civic and community responsibility in meaningful ways.

Public participation will not succeed if it is not genuine—that is, if decision makers are using it as a way to sell a predetermined plan or solution and do not truly care about stakeholder concerns. Public participation is not a one-time event such as a public hearing. The most common pitfalls associated with public participation are processes that are too little, too late, or too negative or unsafe to be constructive to anyone, either the participants or the decision makers.

Successful public participation takes adequate time, resources, and flexibility. Public participation is constructive when all partaking listen to each other, make positive contributions, gain a deeper knowledge of the issue(s), and develop trust and respect for each other, even when there is disagreement.

### **April 28, 2015 – Public Input Meeting, Brevard Community Church**

When the Transylvania County Planning Board and Planning and Community Development Department began the 2025 Comprehensive Plan, it was important to all that the public's voices drive the content of the plan. The Planning Board recruited more than 40 "Community Advocates" to assist with the public participation component of the plan. Together, the Planning Board, Community Advocates, and staff generated an Existing Conditions Report, a survey, a consensus building workshop (which became the April 28, 2015 Public Input Meeting) and Open Houses. The April 28th Public Input Meeting, served as the keystone for the public participation component.

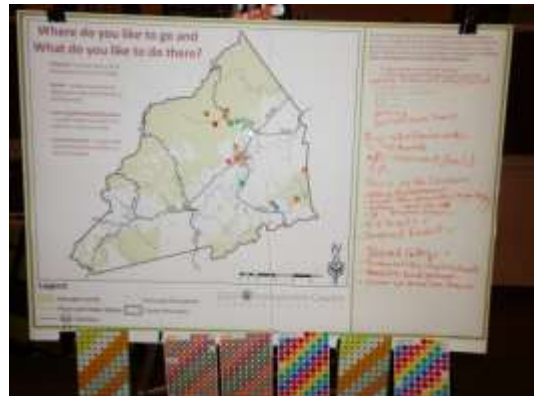

The Public Input Meeting was promoted through multiple resources. There were two ads in the Transylvania Times, posters were distributed around the County, individual fliers were passed out, radio interviews were conducted, the County's Facebook page included a post for the event, County Commissioner and Planning Board meetings include the announcement, and emails were distributed to vast number of individuals in the County through sources such as the Chamber of Commerce, City of Brevard, and Transylvania County Planning and Community Development Department to name a few.

The Planning and Community Development Department sent out an RFP to solicit a public facilitator for the event. The public facilitator was to work with staff, Planning Board, and Community Advocates to design and implement the consensus building workshop. Out of seven competitive applicants, staff selected two local candidates to collaborate on the project: Angela Owen, of TBL Leadership Partners, and John Fenner, of Center for Courage and Renewal and John Fenner Consulting.

The Public Input Meeting provided a platform for members of the community to express their concerns, aspirations, and ideas for the future of Transylvania County. Attendees provided individual input on poster boards and collaborative input via small group discussion lead by the public facilitators. There were three questions that framed the evening and this report summarizes those findings. The three questions were:

1. What are our assets?
2. What do you see Transylvania County being/having 10 years from now?
3. What are the obstacles for achieving this?

The evening began with registration for the event. Each person was randomly assigned a color to correlate with

tables around the room – this separated folks who came together. There were three maps located in the foyer after the registration table and by the food and restrooms, asking questions regarding assets, favorite places to go in Transylvania County, and areas that need attention. Next, the group was welcomed by Planning Board Chair, Wayne Hennie, and Planning and Community Development Director, Mark Burrows. Mr. Burrows premiered the video and promoted participation for the 2025 Comprehensive Plan survey.

Facilitators, John and Angela then began facilitating the meeting. The Community Advocates served as table facilitators, who were trained in advance by John and Angela. The attendance for the evening was approximately 140 participants, not including Planning Board and staff.

### **Data Summary**

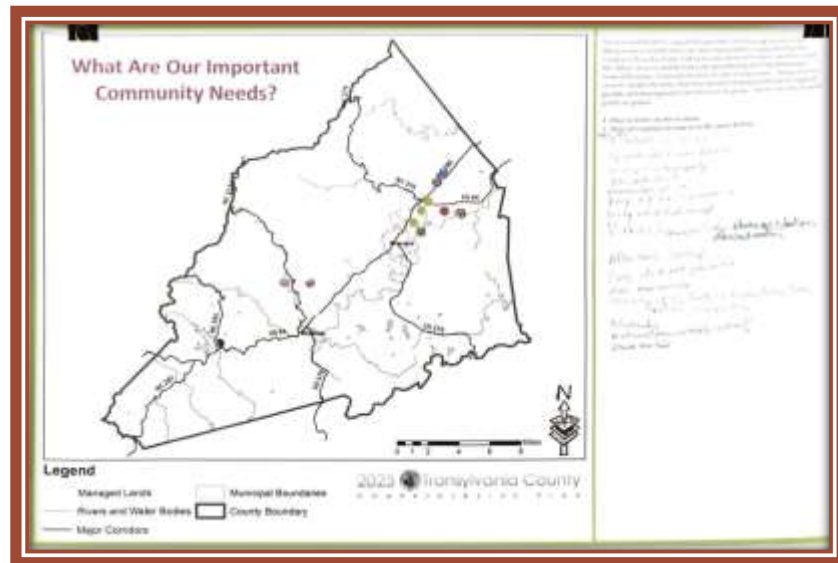

Citizen input was collected in two ways, through a self-guided mapping exercises and small group facilitated questions. The self-guided mapping exercises were available in the entry of the venue and individuals were encouraged to write their comments on the maps provided.

The small group facilitated portion of the meeting was designed with a bottom-up approach. Individuals were asked a series of questions (one at a time) and were asked to write their individual responses on a sticky note. Then they were to share with the group their responses. The group then categorized like responses and named the categories. In addition, they prioritized each category by assigning dots to their individual priority and provided their top three for the wordle. The groups were then asked reflective questions on their responses (e.g. similar patterns, differing opinions) and lastly, what was the most important first step in attaining this vision for the County.

The following tables and charts are a summary of the meeting. The full tabulated results can be found in Appendix A. The meeting evaluation results can be found in Appendix B.

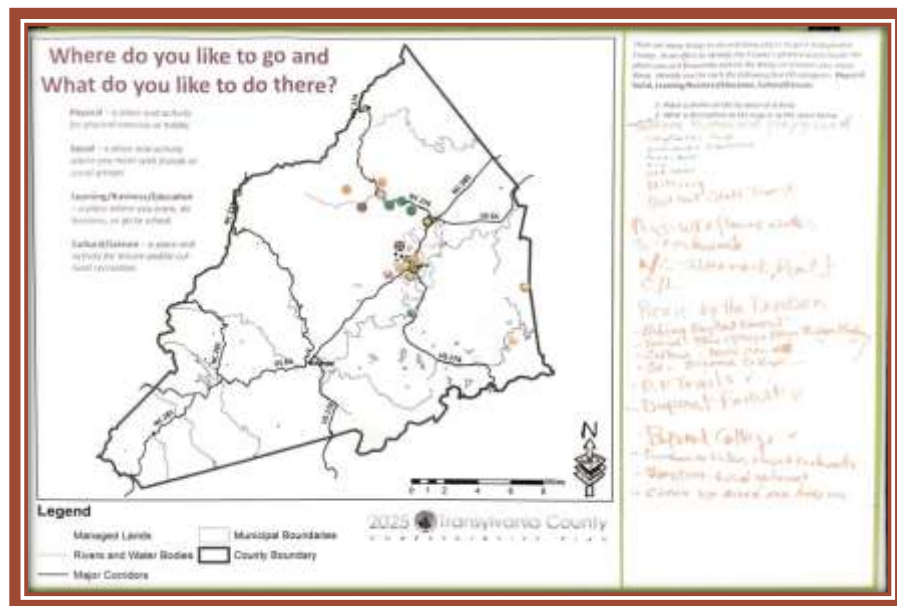

## Mapping Exercise #1 – What are Our Important Community Needs

Services and Facilities support the growth of a thriving community. Many services and facilities are directly funded or supported by the County such as the Public Safety Facility, Animal Control, and the Landfill. Other services are provided by the City of Brevard, Town of Rosman, or private businesses like Comporium. Participants were asked to list the services and/or facilities that Transylvania County could use to support growth and development over the next 10 years. These services may be public or private. Some of the common responses included affordability, bike trails, infrastructure, and industrial development.

*Mapping Exercise #2 - Where do you like to go and what do you like to do there?*

## Improve Rosenwald Playground

## Hiking

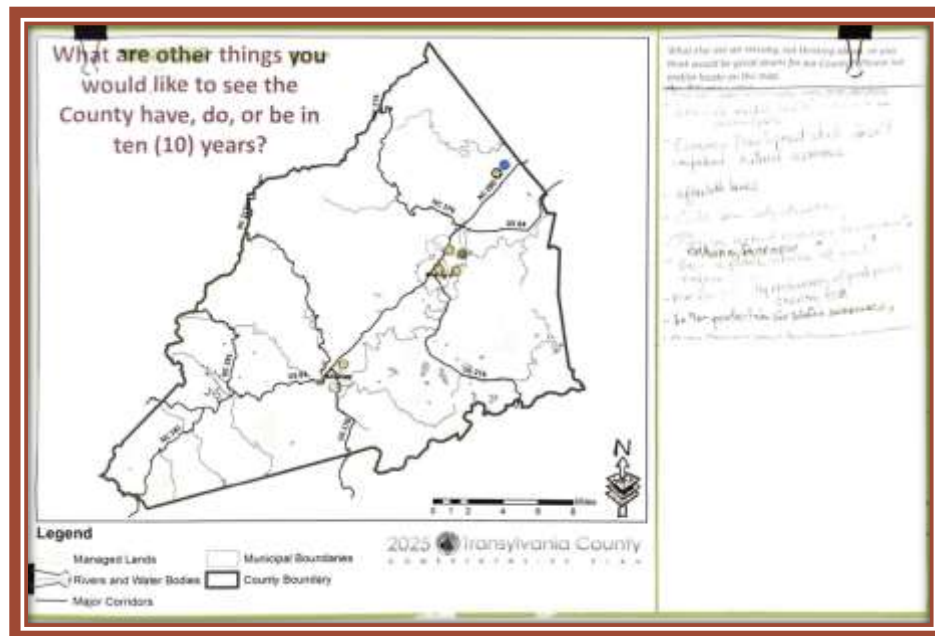

**Phys- Wildflower Walks; S- Restaurants; L/E- Silvermont,  
Rec center; C/L- Picnic by the Davidson**

### P.F. Trails; DuPont Forest; Brevard College

### Breweries/Social gatherings

*Mapping Exercise #3: What are other things you would like to see the County have, do, or be in ten (10) years?*

In this final exercise, participants were asked what we were missing, not thinking about, or what they think would be a great asset for the growth of the County. They were then asked to list and locate it on the map.

**What are other things you would like to see the County have, do, or be in ten (10) years?**

**Make 280 corridor business ready- water, sewer, utilities, and substance abuse**

**Accessible mental health services for children/youth**

**Economic Development which doesn't comprehend natural resources**

**Affordable homes**

**Child care/ Early Education**

**Preserve natural resources/ environment**

**Enhance/increase natural resources/environment**

**Be a place where all feel enfranchised**

**More family friendly restaurants w/ good prices and healthy food**

**Better protection for water resources**

**Enhance protection of people (police enforcement) to retard terrorists.**

***Transylvania County has many assets. Some are used, some are under-utilized, while others are relied upon too much. What are the things in Transylvania County that we can build upon in order to enhance our lives over the next 10, 20, 30 years? In other words, what are the County's most important assets (to you) to be supported, maintained, and/or enhanced? Name 3 and use 1 word to name or describe each asset.***

Participants were asked the question above in order to identify the County's assets. They were then asked to categorize them and vote on the categories that were most important. Below are some of the individual responses prior to categorization (the complete results are found in Appendix A).

Individual Responses to Question #1			
<b>Ecusta Trail</b>	Artistic/musical heritage	Schools	Better Roads
<b>Bike Trail</b>	Beautiful nature	School systems	Hiking
<b>Clean water</b>	Outdoor activities	People	Biking paths
<b>French Broad River</b>	Natural environment	Volunteer system	Outdoors
<b>Forests</b>	Water	Willing workers	Roads
<b>Public Lands</b>	Land, water, and rivers	Diversity	Hiking
<b>Natural Resources</b>	Friendly diversity	Climate	Protect water
<b>Environment</b>	creative ideas	4 Seasons	Water
<b>Diversity</b>	Schools	Beauty	Clean water
<b>Children</b>	Knowledge	Waterfalls	Schools
<b>People</b>	Forest Land	Nature	Downtown
<b>Strong Community</b>	Nature	Parks/Forests	Jobs to supply living wage
<b>Good jobs</b>	Forest	Outdoor recreation	Schools
<b>Employment</b>	Outdoor Recreation	Local arts/artists	Colleges
<b>Small town atmosphere</b>	Schools	Library	Brevard Music Center
<b>Farmers market</b>	Downtown	People development	Forest

The individual tables then grouped each of these items into like categories and voted on what categories were most important. The categories that received the most votes (highest voted category on each table) were **Education, Natural Resources/Environment, People, Culture, and Economic Opportunities** (including outdoor recreation). The table below shows these results.

Top Voted Categories	
<b>Education and Fine Arts</b>	10
<b>Natural Resources</b>	9
<b>Economy/Infrastructure</b>	7
<b>Natural Resources</b>	6
<b>Education</b>	6
<b>People</b>	6
<b>Nature</b>	6
<b>Education</b>	5
<b>Natural Resources</b>	5
<b>Education</b>	5
<b>People</b>	5
<b>Environment</b>	5
<b>Community</b>	4
<b>Economy</b>	4
<b>Culture</b>	4
<b>Education</b>	4
<b>Outdoor Recreation</b>	4
<b>Nature</b>	3

Out of the highest voted categories at each table, the categories that received the most mention in the entire room were **Natural Resources** (voted the most), followed by **Education**, **Culture/People**, and **Economy**.

Highest Voted Categories (Room)	
Category	Votes
Natural Resources	6
Education	5
Culture/People	3
Economy	3

In summary, the individual responses can be viewed as action items for the Comprehensive Plan, while the categories serve as focus areas to leverage in planning future growth and development. Out of the top four categories, we can summarize the following:

**Education:** Community members cited educational references spanning all age groups. Some of the specific assets highlighted included the Transylvania County Schools, Brevard College, Blue Ridge Community College, The Brevard Music Center, The Porter Center, and people.

**Natural Resources Environment:** Described as beautiful, natural assets were consistently touted as important to maintain and support. Forests, parks, rivers, climate, nature, clean water, outdoor trails, waterfalls, and natural resources were listed as examples of environmental assets in Transylvania County. Available because of our natural assets, outdoor recreational activities such as hiking and biking were also listed among the environmental assets to maintain, support, and build upon.

**People:** Citing friendly, creative, diverse and attitude of residents among the list of descriptors, table participants listed people as one of Transylvania County's most important assets. Community participants also highlighted willing workers and a volunteer system among the strengths of the county's people.

**Cultural Resources:** Appreciation for cultural resources resonated as a theme at the public input session. Participants highlighted the Brevard Music Center, the Porter Center, the Transylvania County Library, music, art and mountain heritage.

**Employment Opportunities:** Jobs and employment resonated as assets to build upon at many of the tables. Specific types of jobs referenced included industrial jobs, outdoor recreation jobs, and environmentally responsible jobs. References to commercial properties, empty storefronts, under-utilized former industrial areas, living wage, and an aging workforce were included in this category.

## Question #2

*Imagine you are in Transylvania County 10 years from now. The County is exactly as you have scripted it to be 10 years ago and you are now living in this County. If you were to stop and take a photograph of it as it is in this future place, what do you see in the picture? Describe 3 things you see using 3 words or less for each item.*

Figure 2. Question #2 Wordle results.

For question #2, participants were asked the question above in order to identify the things they imagine Transylvania County being/doing/having ten years from now. As with the first question, participants were then asked to write their individual responses, categorize their answers as a table, and then vote on the categories that were most important. Below are some of those responses (the complete results are found in Appendix A).

Individual Responses to Question #2			
<b>Landscape w/o pollutants</b>	Clean industry based on environment	Young people retention	Black and brown businesses
<b>Clean watershed</b>	New low-impact industries	Engaged youth	Ecusta property developed, mixed-use
<b>Greenspace</b>	Growing school registration	Careers/growth	Stronger sense of community
<b>Technical institute</b>	Everyone employed	Lower taxes	Diversity
<b>Modern education building</b>	Light industry	Strong Economy	No hungry people
<b>Clean technical employment</b>	Living wage jobs	Large Industry	Not much bigger
<b>Diversity/equal opportunity</b>	Tier 1 community	Small businesses	A-1 High-tech education
<b>Happy families/safe</b>	Clean environment	Strong Economy	Stronger neighborhood schools - thriving colleges
<b>No more people</b>	Still pristine	Good jobs	County school buildings in good condition
<b>More people of color</b>	Young families	Green Spaces	Vibrant school system
<b>Diverse friendly community</b>	Ecusta trail	Clean streams and air	French Broad River clean and protected
<b>No cars in city/small buses frequently</b>	Families enjoying Brevard	Preservation of natural resources	Bike lanes and racks like European community

The individual tables then grouped each of these items into like categories and voted on what categories were most important. The categories that received the most votes (highest voted category on each table) were **Education, Natural Resources/Environment, People, Culture, and Economic Opportunities** (including outdoor recreation). The table below shows these results.

Highest Voted Categories Per Table	
Category	Votes
Thriving Economy	7
Jobs	7
Family Oriented	6
Strong Job Opportunities	6
Clean Environment	6
Outcome of Infrastructure and Jobs	6
Jobs	6
Protected Environment	6
Sustainable Development	5
Diversity/people	5
Sense of Community	5
Youth Retention	5

Economic Development	5
Environment	4
Education	4
Industry	4
Transportation	4
Excellent Diverse Population	4
Infrastructure	4
Education	4
Economic Development	4
Infrastructure	3
Environment	3

Out of the highest voted categories at each table, the categories that received the most mention in the entire room were **Economy/Jobs, Environment, People/Community, and Infrastructure.**

Highest Voted Categories (Room)	
Category	Votes
Economy/Jobs	7
Environment	4
People/Community	4
Infrastructure	4

In summary, we can say the following about the results:

**Economy/Jobs:** Many of the items related to the economy and jobs, including the desire for more small businesses, larger industry, well-paying jobs, sustainable development and green technology. Participants referenced the need to keep younger people in the County by having a supportive job network multiple times.

**Environment:** When depicting the future as they would have it, community members described clean watersheds, pollution-free & pristine landscape, greenspace, healthy natural resources, better landscaping of businesses, clean rivers, a usable community lake, rails to trails, bike lanes, and the absence of telephone poles.

**People/Community:** Population diversity and young people ranked among the highest mentioned items. Also included were young happy families, racial diversity and equality, a sense of community, and strong citizen involvement.

**Infrastructure:** Water and sewer infrastructure was mentioned numerous times. This infrastructure would support economic development efforts as well as other growth areas. Improved transportation networks, including bike and pedestrian facilities, were also mentioned frequently.

### Question #3

***You now know what your ideal Transylvania County will be like 10-20 years from now. Now let's think about getting there from where we are today. With your ideal picture in mind, name 3 things that are challenges or obstacles for achieving your ideal image and what we as a community can do to address them? In other words, name three obstacles the County will have to overcome, or be aware of, in order to become your pictured County.***

### Figure 3. Question #3 Wordle results

For question #3, participants were asked what obstacles the County would face in achieving question #2. As with the other questions, participants were asked to write their individual responses, categorize their answers as a table, and then vote on the categories that were most important. Below are some of those responses (the complete results are found in Appendix A).

Individual Responses to Question #2			
<b>Ordinance useless</b>	Regulations	Lack of roads across county	Shared use of water
<b>Too much structured planning, more spontaneous development</b>	No Common citizen vision	Lack of manufacturing space	Active RR or Ecusta Trail
<b>Policies and politics</b>	Infrastructure capabilities	Apathy	Affordable housing
<b>Taxes too high</b>	Money	Government selling of forest lands	Lack of unity between City and County
<b>Funding</b>	\$	lack of infrastructure	Lack of County commitment
<b>Abolish UDO</b>	Clean environment	Career focus education	Loss of cultural identity
<b>Government not open to younger generation</b>	Public awareness	Attracting quality businesses	Unwillingness to pay the bills
<b>Infrastructure, water, sewer, roads</b>	County Commissioners	Over-use of resources	No infrastructure water and sewer
<b>Insufficient utility infrastructure</b>	Taxes utilization	Balancing industries environment	Poor road maintenance
<b>Sierra Club, AAW, ACLU, NAACP</b>	Community disinterests	Responsible waste removal	Resistant to change

The individual tables then grouped each of these items into like categories and voted on what categories were most important. The categories that received the most votes (highest voted category on each table) were **Education, Natural Resources/Environment, People, Culture, and Economic Opportunities** (including outdoor recreation). The table below shows these results.

Highest Voted Categories Per Table	
Category	Votes
Lack of Infrastructure and Funding	7
Jobs	7
Lack of Infrastructure	7
Regulations	6
Polarization/Gridlock in Local Government	6
Polarized Leadership	6
Funding	6
Regulations	5
Infrastructure	5
Politics	5
Economic Challenges	5
Economic Development	5
Economic	5
Infrastructure	5

Limited Land, Buildings, Water/Sewer	5
Poor Political Leadership	5
Funding	4
Leadership and Attitude	4
\$	4
Attitudes	4
Money	4
Infrastructure	4

Out of the highest voted categories at each table, the categories that received the most mention in the entire room were **Funding**, **Lack of Infrastructure**, **Politics/Leadership**, and **Economy/Jobs**.

Highest Voted Categories (Room)	
Category	Votes
Funding	5
Lack of Infrastructure	5
Politics/Leadership	5
Economy/Jobs	4

In summary, we can say the following about the results:

**Funding:** According to the participants, a shrinking tax base and an unwillingness to raise taxes are the major reason for inadequate funding. Some other reasons are that there is no infrastructure, no economic development, lack of resources to draw from, lack of vision and willingness to invest.

**Lack of Infrastructure:** Limited land, buildings, industrial sites, sewer and water infrastructure were the most important of infrastructure needed. Also included were improved transportation networks, roads, utilities, medical care, Brevard bypass, and railroad use.

**Politics/Leadership:** Politics served as a big obstacle. Divided leadership, polarizing politics, City and County cooperation, lack of vision, inflexible attitudes, non-progressive politics, and inability to solve problems were some of the leading comments.

**Economy/Jobs:** Lack of job opportunities and economic development were obstacles for achieving desired results. Cost of living and affordable housing were linked to this category.

## Question #4

### Reflective Questions (Grid)

While staff compiled the priority results in order to display a Wordle (word graphic showing highest priorities) for each question, the groups were asked to reflect on their work by answering four questions:

1. **What Patterns do you notice?**
2. **Where is there agreement? What do you, as a table, have in common?**
3. **Where are there differing opinions?**
4. **What questions do you have?**

The reflective questions show us what the group observed through their work. Some of the responses were as follows:

Reflection Questions	
<b>4a. What patterns do you notice?</b>	
	● Pro growth
	● Pro jobs
	● Pro infrastructure improvements
	● Concerns about local government: regulation, leadership, cooperation
	● Preserving natural resources
<b>4b. Where is there agreement? What do you, as a table, have in common?</b>	
	● Economic development/growth/jobs
	● Infrastructure improvements needed
	● Preservation of natural resources
	● Need for better collaboration/cooperation between city and county government
	● Concern over quality of education
<b>4c. Where are there differing opinions?</b>	
	● Natives vs. Newcomers
	● Prioritization of issues
	● Planning strategies
	● How to achieve shared vision
	● Optimism vs. Lack of Optimism re: ability of leadership to achieve a vision for the future
<b>4d. What questions do you have?</b>	
	● Comprehensive Planning Process Questions
	● City/County Cooperation
	● Health Care
	● Payment for improvements
	● How much would it cost to buy back Davidson River Village?

## Question #5

**Question #5: FINAL QUESTION: If you were to look back from 2025, what was the most important first step that was taken to create the collective vision and priorities of Transylvania County?**

Participants were asked this question so that County leaders have some insight on what steps can be taken to assist in achieving the goals of the comprehensive plan. Some of the categories that developed include **Community Input, Leadership, Infrastructure, Economic Development, Vision/Consensus Building, Revenue Spending**, and **Miscellaneous**. An example of these results include (all results are located in Appendix A):

FINAL QUESTION: If you were to look back from 2025, what was the most important first step that was taken to create the collective vision and priorities of Transylvania County?	
<b>Community Input</b>	Provide the means to seed <u>and</u> listen to community concerns, priorities and <u>insight</u> !  The most important first step was the decision of the County Planning Board and Board of Commissioners to "consult" the community and solicit input from all sectors. This comprehensive plan will be the result of the County's collective thinking.
<b>Leadership</b>	True political leadership, the courage to take risks for reach- in the long-term goal- the courage to invest in infrastructure to draw sustainable businesses, the political will to implement zoning, all leading to full and fulfilling employment, community prosperity and a healthy future.  Both elected bodies (City Council and County Commissioners) were replaced with people willing to be leaders, make decisions and move forward.
<b>Infrastructure</b>	We must fund infrastructure. Without infrastructure there is no economic development, which means no jobs, which means no growth.  Improved infrastructure- this inviting new job opportunities by bringing in job markets. Affordable homes for all types of job levels. Excellent education throughout Transylvania County- Elementary -Middle Schools -High Schools. Current textbooks, equipment, buses, sports, scholar opportunities- making our schools #1!
<b>Economic Development</b>	The 3 governments were consolidated to work on one set of priorities. New roads, Rosman to Airport; one water and sewer authorization for the county; realistic look at job possibilities.  Attract companies from outside the county to expand their business here (e.g. Oskar Blues, South Carolina Story).
<b>Vision/ Consensus Building</b>	The first step would be to create a <u>rough</u> consensus for moving ahead! Unanimity is not possible. So aim for a majority- the larger the better. Just move even if it is only a 51% majority.  The most important step from 10 years ago (2015) was I create a REALISTIC vision.
<b>Revenue/ Spending</b>	You have to spend and invest money to make money. If not spending it will lead to economic prosperity, then how has <u>that</u> been going for us? (not good)  Getting our representatives to realize that only by spending money (from the increased tax revenues) can you move forward.

<b>Miscellaneous</b>	A comprehensive long range plan processed through the several segments of Transylvania County and eagerly supported by the County Commissioners and City Counsel.  1. Set a real goal/goals and publicly announce- print it. 2. Create a set of measurements to track progress to the goal. 3. Create a time-line of desired progress.
----------------------	--

## Facilitator Observations

John and Angela provided a brief training session to a group of volunteer Table Facilitators. These volunteers quickly learned the process and led their table groups with excellence. Table seating was loosely formatted to foster diversity of thought and cross-representation of communities. Table facilitators leveraged the process to engage participants at their tables both individually and collectively, creating an environment that fostered individual thinking against a backdrop of more collective understanding. Planning Board Members engaged table participants via active listening and played vital roles in collecting summaries from each table.

The energy level in the room was high throughout the evening’s process. Community participants expressed their viewpoints and interests in an atmosphere of mutual respect and positive spirit. Expressing gratitude for the “spirit” of the Public Input Meeting, participants at many tables expressed a desire to move past the differences that often divide our county and forward into a place of bridge building solutions.

## Conclusions

Community members who engaged in the Public Participation Input Meeting demonstrated energy and passion for the future of Transylvania County. Participating community members embraced the input process and expressed enthusiasm for the opportunity to share their thoughts and make their voices known. The spirit of the evening reflected hope and optimism for Transylvania County’s future as well as a diversity of thought.

As reflected in the summaries of each question, several ideas were shared among participants with overlapping themes emerging between questions. For example, *education*, *environment*, and *people* were consistent themes for both Question #1 (the county’s most important assets) and Question #2 (the things one would see in ideal Transylvania County in 2025). These themes reflect shared values for the people and natural resources, as well as a common desire to protect and preserve them both as the county moves forward.

A number of different opinions and perspectives also surfaced throughout the process. Different ideas about “natives” and “newcomers,” residents and tourists, land use regulations, and the types of businesses to attract to the county were listed, to name just a few. These differences present obstacles and opportunities, which are important to acknowledge and address in the 2025 Comprehensive Plan.

Highlighting *government regulations* (land use, business, taxes), *leadership* (polarizing politics, city/county division, lack of common vision), and *infrastructure* (water/sewer, roads, utilities, health care) as key obstacles to overcome, participants expressed the compelling need for leaders to build bridges by creating a common vision for Transylvania County and to develop innovative solutions to achieve such a vision. Although obstacles such as these were highlighted as part of the process, a spirit of opportunity permeated participating citizens.

Similarly, community members want, need and expect community leaders to

- Work together across boundaries (County, City of Brevard, Town of Rosman, etc.);
- Engage in meaningful discourse with one another while maintaining mutual respect;
- Build bridges that lead to solutions to the challenges we face; and
- Exercise decisive leadership in moving Transylvania County forward.

Based on this Public Input Meeting, the work by the planning staff, and Planning Board members, we think that the 2025 Comprehensive Plan will capture the hopes, dreams, and needs of Transylvania County residents. We look forward to seeing how all the public input comes together and is synthesized by the Planning Board and staff as they begin to develop draft goals and objectives.

## Appendix A - Tabulated Responses

**Question #1: Transylvania County has many assets. Some are used, some are under-utilized, while others are relied upon too much. What are the things in Transylvania County that we can build upon in order to enhance our lives over the next 10, 20, 30 years? In other words, what are the County's most important assets (to you) to be supported, maintained, and/or enhanced? Name 3 and use 1 word to name or describe each asset.**

	<b>Other</b>	More diversity	1
		Green technology	

**Question #3: You now know what your ideal Transylvania County will be like 10-20 years from now. Now let's think about getting there from where we are today. With your ideal picture in mind, name 3 things that are challenges or obstacles for achieving your ideal image and what we as a community can do to address them? In other words, name three obstacles the County will have to overcome, or be aware of, in order to become your pictured County.**

## Reflection Questions (Grid)

### 4a. What patterns do you notice?

- Pro growth
- Pro jobs
- Pro infrastructure improvements
- Concerns about local government: regulation, leadership, cooperation
- Preserving natural resources
- Importance of education
- Quality of life issues
- Need for affordable housing
- Community: need for unity, polarizing pressures

### 4b. Where is there agreement? What do you, as a table, have in common?

- Economic development/growth/jobs
- Infrastructure improvements needed
- Preservation of natural resources
- Need for better collaboration/cooperation between city and county governments
- Concern over quality of education
- Interconnectedness of issues
- Concern over aging population and desire to keep young people here

### 4c. Where are there differing opinions?

- Natives vs. Newcomers
- Prioritization of issues
- Planning strategies
- How to achieve shared vision
- Optimism vs. Lack of Optimism re: ability of leadership to achieve a vision for the future
- Diversity: chasm between Latino population and others, invisible African American community
- Residents vs. tourists
- Taxation: more or less and how?
- Types of businesses: manufacturing, small business, etc.
- Land use regulations
- Preservation of land vs. enough land already restricted
- Definition of affordable housing
- How much emphasis to place on outdoor activities

### 4d. What questions do you have?

- Comprehensive Planning Process Questions
  - Will there be benchmarks and accountability built into plan?
  - How will this information be shared?
  - What is the timeline for this process?
  - In what communities will input be sought?
  - What is the next step after this meeting?
  - How will the County Commissioners act on the outcome - recommendation?
  - How will there be representational input with survey?
  - What value will our elected leaders, Commissioners, place on all community input?
  - How will there be representational input with survey?
  - How do we plan to survey the homeless?

- 
- How do we facilitate the vision for the county?
  - How do we keep the motivation and engagement of the community? How do we engage minorities in the process?
  - How can we go about implementing these ideas?
  - Why have needed improvements, past goals not been accomplished?
  - City/County Cooperation
    - Do we need an official liaison to foster collaboration between City and County?
    - How can we get the city and County to work together?
    - Should we consolidate local governments?
  - Health Care:
    - Future of Transylvania Regional Hospital
    - Who has control and ownership of health care system?
    - Where does health care fit?
    - Can mental health resources be included in plan?
  - Payment for improvements
    - Are we willing to pay for improvement?
    - How does our "dream" get paid for?
    - How does the current utilization of our tax dollars support growth?
  - How much would it cost to buy back Davidson River Village?
  - Why don't we recognize the importance of early childhood education as building block?
  - What do we do about nutrition/hunger?
  - Will Brevard College move into areas of science and math technology?
  - Why are we all here? And how do we maintain this while growing?
  - How much reliance on tourism is too much?
  - Status and possibilities for infrastructure
  - What provision for continuous planning?
  - Balance between regulation & protection
  - How can we use help to develop a desire in people to seek out available jobs?
  - How can we incentivize people to get off welfare and trade it for meaningful work?
-

**FINAL QUESTION: If you were to look back from 2025, what was the most important first step that was taken to create the collective vision and priorities of Transylvania County?**

<b>Community Input</b>	Provide the means to seed <u>and</u> listen to community concerns, priorities and <u>insight</u> !
	The most important first step was the decision of the County Planning Board and Board of Commissioners to "consult" the community and solicit input from all sectors. This comprehensive plan will be the result of the County's collective thinking.
	<u>Community Building!</u> For example, this sort of meeting, together with the 25 community meetings, is a "first step" in community building. The founding of an NAACP chapter was also a "first step" in community building. The more opportunities to really <u>talk with</u> each other <u>across our differences</u> , the better.
	Getting citizens at the various community meeting to participate in thinking and planning.
	Hearing voices of our citizens.
	We came together and we talked together.
	Getting community input from as many people as possible, followed by <u>ACTION</u> . Get it done.
	The most important first step was to involve <u>all</u> community members to "envision" the future that they want.
	The most important step was to involve many voices in looking at our values and visions.
	Ask for public input and used the data from the public to implement the plan that provided answers to the problems identified. Such as jobs, schools, infrastructure. The most important first step was to discover what "the people", or residents see happen in this county. The second step was to carry through with these wishes, based on benchmarks to guarantee this.
	Inner reaction of <u>ideas</u> from people of diverse backgrounds.
	Open and inclusive conversations!
	Creating a <u>process</u> for broad-based input from county residents- in 2015 and in previous decades there has been too little bridge-building, consensus-building, diffusion and distrust. These meetings are a step in the right direction.
	First step- meaningful discourse. Somehow hearing from those we usually don't hear from. What do the kids at the colleges think? What do longtime residents, folks who use Sharing House and other similar programs, young parents think? How do we get their participation?
	The most important first step is to have the public input and buy in, but it mustn't stop there. Decisive leadership must follow.
	Creating a process to bring the community together to create a vision. We met new people, shared stories and perspectives and enjoyed working together. It was a great start!

	Getting information from the people in the County, and encouraging County leaders to look at what everyone thought was important.
	Ask for input.
	Participatory process. Keeping the community informed. Being here this evening and participating in other planning sessions- (Brain storming sessions).
	Obtained input from community, disperse of information to general population. Community buy-into process and goals.
	Most important first step: Find an effective way to hear from diverse representatives of our county.
	Engaged in dialogue. Hearing from all facets and income levels in the community. Being caring of each other and the needs of all people. Being inclusive of all people and their needs.
	The major first step is gathering genuine input from community members- as many as possible- then <u>listening</u> to their ideas.
	Community outreach to 50% of county residents through: Church Groups, Education Groups, Community Centers/Neighborhoods, Civic and other organizations.
	Participating in a session such as this to help bring common focus to the issues at hand.
	Networking to find out what the majority agrees on to act toward. This process is repeated until each project/vision is completed.
	Opening the planning process to community members- making the effort to involve as many as possible.
	Getting to know other citizens.
	Communicate with each other. Discussed all of the issues that will make a difference.
	Educate community about asset-based community development.
	1st step: An <u>unbiased</u> (your current survey is biased toward zoning) survey that is statistically valid (not just based on how many hippies you can line up). Then weigh the survey by the economic input of the actual taxpayers - that would give the upper end of the county a voice because townships pay most of the taxes.
	From the collective group input that originated, take the input and put into Acton. Market our resources (assets) aggressively.
<b>Leadership</b>	True political leadership, the courage to take risks for reach- in the long-term goal- the courage to invest in infrastructure to draw sustainable businesses, the political will to implement zoning, all leading to full and fulfilling employment, community prosperity and a healthy future.
	County leaders and City leaders working together to reach a common goal that benefits everyone.
	Both elected bodies (City Council and County Commissioners) were replaced with people willing to be leaders, make decisions and move forward.
	County leaders (political, educational, business, and cultural) set aside partisan bias and work to a shared vision.

	Streamlining momentum to take ideas to the next level. Strong collaboration and clear goals; non-partisan government used to move goals into reality. No in-fighting, no politics just get it done.
	We held a vote of no confidence and ousted our County Commissioners, replacing them with people with progressive mindsets.
	Voted for County, City, and Town leaders willing to work together and lead in making the case for citizens to participate and pay the bill needed for community investment.
	Leadership of County, Brevard, Rosman and County School System <u>work together</u> to develop a county-wide vision.
	We agreed (we the leaders and politicians) to put the future of Transylvania County <u>first</u> and partisanship second.
	A strong leader with access to funds must step forward and the crowd will live with his preference.
	Collaboration to make a change in government, use of funds, process of decision making.
	First Step: Elect County Commissioners who will develop vision by truly <u>listening</u> to <u>all</u> constituents in the county, who will value <u>diversity</u> , who are willing to <u>change</u> , and grow, who will inspire the citizens to become involved in a bold and creative future where all are welcomed and celebrated and where opportunities abound.
	Cooperation within the government- elected officials cooperating.
	Informed visionary public officials.
	To have the members of the Planning Board and the Board of Commissioners have an open mind and not just say NO to everything.
	Elect County Commissioners that have the interest of all residents and vote representative and not personal agenda.
<b>Infrastructure</b>	We must fund infrastructure. Without infrastructure there is no economic development, which means no jobs, which means no growth.
	Invest in infrastructure.
	Improved infrastructure - this invites new job opportunities by bringing in job markets. Affordable homes for all types of job levels. Excellent education throughout Transylvania County- Elementary -Middle Schools -High Schools. Current textbooks, equipment, buses, sports, scholar opportunities- making our schools #1!
	The infrastructure which was strengthened with resolve to focus on current as well as future needs - basic needs- <u>not</u> "pie in the sky ideas, not "what ifs" but concrete, common sense plans for the greater good.
	Provided an adequate infrastructure to attract industry providing adequate paying jobs and affordable housing to attract well educated young people.
	Infrastructure to create jobs. Create jobs that would keep local young people and families in our county.
	Cooperative county-wide water and sewer system. Table land use issue. Overall upgrade of infrastructure. Focus on needed utilities to attract job providers.

	Water is vital. We must take control or we will lose control. We must dedicate funds.
	Built new potable water supply.
	Countywide authority for water/sewer.
	Agreed on basic needs, infrastructure, roads, protect our water, education, patience with process, don't leave out healthcare.
	Increase taxes to support building infrastructure to attract business!
	As a county, the 280 corridor and 64 towards Rosman has the infrastructure in place that has brought a variety of businesses to TC that created more JOBS that attracted young families that moved here to stay and increased our school enrollments- at all levels.
<b>Economic Development</b>	The 3 governments were consolidated to work on one set of priorities. New roads- Rosman to Airport. One water and sewer authorization for the county. Realistic look at job possibilities.
	Attract companies from outside the county to expand their business here (e.g. Oskar Blues, South Carolina Story).
	Decide how to develop an economy that was sustainable (producing above living-wage salaries), while maintaining the employment of people from our communities. Realizing education is as important as our economy and our environment. *Everything is equally important* Education, Economy, Environment, Representation, Industry.
	Speak with <u>one voice, one vision</u> , towards a <u>pro-growth agenda</u> ! 1. Jobs, 2. Infrastructure, 3. Economy.
	Recruit industry
	Jobs, Jobs, Jobs, Good Jobs.
	Develop a diverse economic development plan .
	Careful thought of economic development and how to keep the assets of the county.
	Created incentive for new business and industries.
	A self-supporting county large industry, jobs for our kids. If they keep having to leave, our county cannot grow. Obstacles: A large portion of our residents are retirees. They don't want industry!
	We need to look at the job market and affordable housing so people can afford to stay in the community they grew up in and love.
	Looking back the first step to improving the county is to recognize that our younger generation could be our greatest asset and we need to have good enough jobs to sustain a young family. We need to move away from the retirement community/tourism community to bringing in well-paying jobs to give our younger generation an opportunity to live, work, and raise their families here.
<b>Vision/ Consensus Building</b>	Plan for the future. Have a vision for the county.
	The most important step from 10 years ago (2015) was I create a REALISTIC vision.

	The first step would be to create a <u>rough</u> consensus for moving ahead! Unanimity is not possible. So aim for a majority- the larger the better. Just move even if it is only a 51% majority.
	We started with seeing ourselves as a family with all voices being worthy and deserving to be heard. We realized that we do have a shared vision and with openness and good communication and heart, we can find a creative way to reach our shared goals.
	A group came forward with a vision for the future of Transylvania County and a leader came and led the way!
	Collaborate with common vision for growth in the community. Acceptance of community values. Recognize the value of land use planning.
	Intentional effort to identify and bridge gaps: Cultural, economic, and political.
	There seem to be two schools of thought in TC on almost all issues. City v. County, alcohol v. no alcohol, Ecusta Trail v. Rail ED pursuing, higher taxes to fund growth v. low taxes. We must get agreement and/or buy-in from both camps to be successful.
	Acknowledge that there is a very large difference in what the urban and retirement sections of the community want vs. the wants desires and dreams of the rural section of the community.
<b>Revenue/ Spending</b>	Generate enough revenue to invest in this community to MAKE IT HAPPEN! <u>JUST DO IT</u>
	You have to spend and invest money to make money. If not spending it will lead to economic prosperity, then how has <u>that</u> been going for us? (not good)
	Getting our representatives to realize that only by spending money (from the increased tax revenues) can you move forward.
<b>Miscellaneous</b>	A comprehensive long range plan processed through the several segments of Transylvania County and eagerly supported by the County Commissioners and City Counsel.
	1. Set a real goal/goals and publicly announce- print it. 2. Create a set of measurements to track progress to the goal. 3. Create a time-line of desired progress.
	Consolidate laws so businesses can come here easily. Be aggressive in seeking funding from tax structure innovation and resources for mountain communities, organizations, schools, facilities for youth, professionals and seniors.
	Acknowledged we needed to address the challenges and are working towards a goal.

## Appendix B - Tabulated Responses

 Communication; Flyer & JHCP Communication

### COMMENTS (Summary):

#### What did you like most about this Program?

Chatting with Others  
 Respect for community input Small Table Format  
 Spirit of Group  
 Opportunity to interact with people I didn't know Meeting Others  
 Time to discuss underlying issues Rules of engagement excellent

#### What areas need improvement?

Need more Diversity None  
 Publicity of Meeting  
 Timing was tight - not much time for discussion Improved promotion of event  
 Better coordination with Brevard & Rosman

#### General Comments:

Rules of engagement excellent Good job  
 Good process  
 Good to Involve the Community Overall good communication of ideas
